

BXT2-16

Battery Powered Combination Tool for Polyester and Polypropylene Strapping

More strapping cycles between recharges

Easy operation

- Ergonomic design reduces operator fatigue
- Simple two-button operation

Versatile design

- Light or regular tension adjustment
- Semiautomatic and automatic settings with one button operation
- Accommodates polyester and polypropylene strapping
- Optional electrical cord adaptor for stationary applications

Low maintenance

- Brushless motor for less wear and longer life
- Innovative battery design reduces contact damage

Specifications

Strapping: For use with 3/8", 7/16", 1/2" and 5/8" (9mm, 11mm, 13mm and 16mm) polyester and polypropylene strapping

Tension rating: 200 to 550 lbs (890 to 2447 N); Light tension: 88 to 335 lbs (391-1490 N)

Weight: 9.0 lbs (4.1 kg)

Charger and two batteries included
