Ink is water soluble and biodegradable, simplifying the recycling process

## Economical

Inexpensive damage prevention that can be used in diverse markets

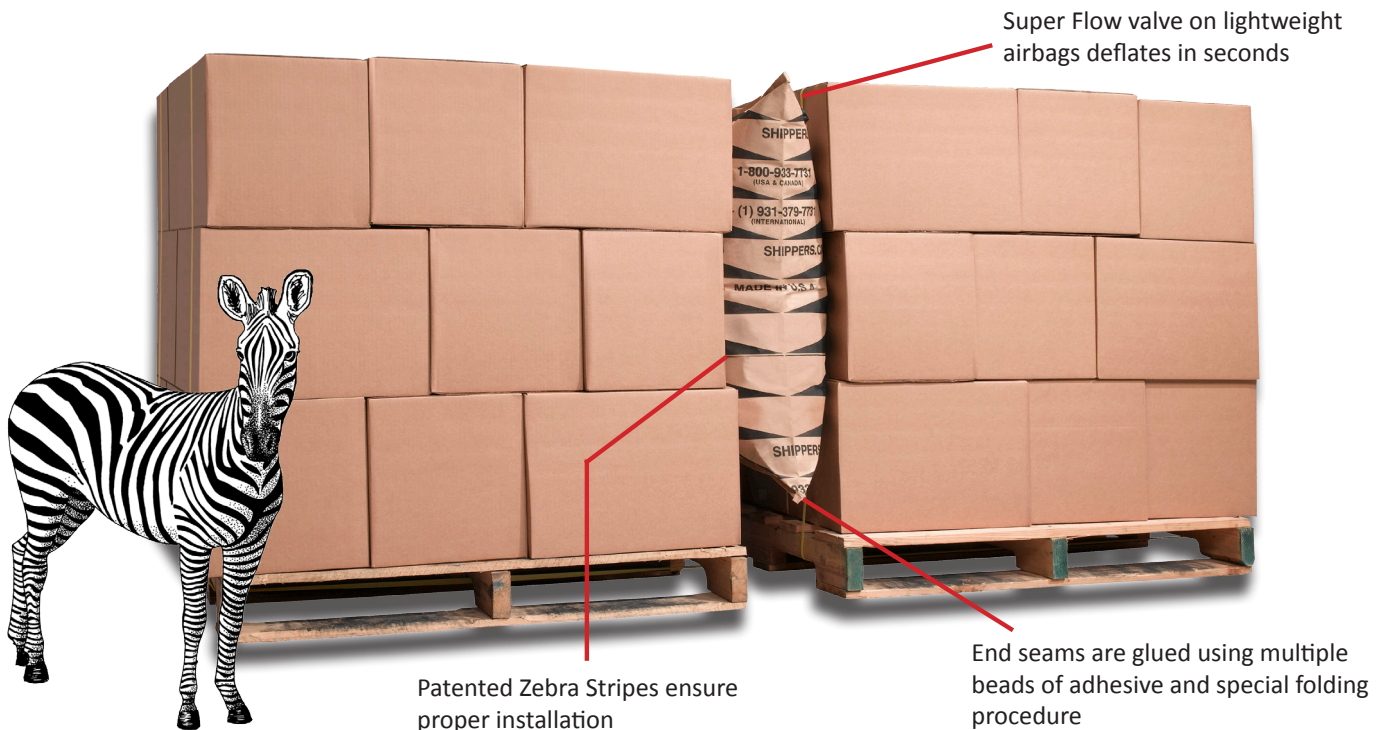

## AAR Verified

Thoroughly tested and verified by the Association of American Railroads

## ZEBRA PAPER AIRBAGS | SHIPPERS PRODUCTS™

Available in Levels 1-4, Abrasion Resistant (AR) and Sewn End (SE), Zebra Paper airbags have patented Zebra Stripes to ensure airbags are properly installed and match specific voids. The Zebra's Double End Fold (DEF) Level 1 airbag seams are glued using beads of adhesive glue. A special folding procedure is used on our Level 2-4 airbags, resulting in stronger end seams. with both Stock and Made to Order sizes. For further details, contact a sales rep today.

Super Flow Inflator for use with our Lightweight Zebra Airbags

Digital Inflator with TX Chuck for use with our Heavyweight Zebra Airbags

## WHICH AIRBAG IS RIGHT FOR ME?

Shippers provides six types of Zebra Paper airbags in Levels 0-4. Which airbag is right for you depends on a number of factors such as load weight, product type, shipping method and loading method. Lightweight Level 0-1 airbags are primarily used to brace loads that have a payload of less than 45,000 lbs. Heavyweight Level 2-4 airbags are used in payload weight ranging from 45,001 lbs to 216,000 lbs. To determine which airbag is right for you, contact a sales representative for a no obligation load audit.

	Lightweight			Heavyweight
